EXAMINER'S AMENDMENT

Allowable Subject Matter

1. Claims 30, 31, 34, 36-38 and 47-50 are allowed.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with Tony Bonner on January 12, 2006.

AMMENDMENT to APPLICATION

4. The application has been amended as follows:
 - a) Claims 32, 33, 35 and 39-46 have been canceled.
 - a) Regarding claim 30, line 11
--wherein the voicemail server is further configured to send the release message to a service switching point (SSP) associated with the voicemail server,

Art Unit: 2645

wherein the release message includes a GR-1129 message comprising a remote operations (RO) parameter, and

wherein the remote operations (RO) parameter includes the revert number.--has been inserted following "associated with the predetermined revert number";

5. The following is an examiner's statement of reasons for allowance:

Regarding claims 30 and 47, Buckley et al, European Patent Application No. 0,255,325 (hereinafter Buckley) fails to disclose:

wherein the voicemail server is further configured to send the release message to a service switching point (SSP) associated with the voicemail server,

wherein the release message includes a GR-1129 message comprising a remote operations (RO) parameter, and

wherein the remote operations (RO) parameter includes the revert number.

Because Buckley states the switch processor transmits a disconnect message to the voice mail service system (see lines 35-45 of column 22), Buckley teaches away from sending a release message from the voicemail server to a service switching point.
